

## MS<sup>®</sup> Melt Blown Filter Bag

### General Description

MS<sup>®</sup> Melt Blown Filter Bag provides outstanding performance on contaminant applications where the minimalization of particle travel is important. The Melt Blown Filter Bag contains three layers: a pre-filtering layer that removes coarse debris; the primary layer, composed of micro pores (for efficient particle retention); and an outer cover that prevents fiber migration. The finish-free fibers are non-foaming, which is ideal for food, beverage, water, chemical and coatings applications. Our long life time Melt Blown Filter Bag has very large dirt holding capability.

### Feature

- Made of super pure PP melt blown fiber
- Absolute filtration efficiency
- Super filtration area
- Multilayer structure and complete filtration
- Good dirt holding capacity of impurity
- Good chemical resistance
- Especially suitable for removal of oil, gel and so on

### Specifications

Structure	Material	Temperature	Chemical Resistance	Filtration Accuracy (μm)	Filtration Style
Melt Blown	PP	<80 °C	Water,Salt,Alkalis, Concentrated acid	1,5,10,25,50	Depth filtration; Absorption filtration

#### USA

Toll free: 866-528-4572

Fax: 732-412-4040

Address: 1108 Spring View Lane Plano, TX 75075

#### China

Toll free: 400-620-1660

Fax: 0086-21- 51687551

Address: 2202, No.1759 North Zhongshan Road, Shanghai

## Applications

- Syrup filtration
- Boiler condensed water
- Electrophoretic paint filtration in Automotive industry
- Decolorant filtration in Chemical and Pharmaceutical industry
- Fruit juice filtration

## Part Numbers / Ordering Information

FOR EXAMPLE

FBPPM005P01PS	FB-----Filter bag	PPM----- PP Melt Blown
	005P-----pore size: 5µm	01PS-----size: 01, Plastic gasket, standard
